About Simple Stuff Works®

We are a family run organisation with a passion for supporting people to protect body shape. We provide high quality education and therapeutic positioning equipment with an aim to eradicate the preventable problems associated with body shape distortion. We are driven by our core family values of compassion, trust and dignity. Our advisors and colleagues are all highly experienced, having written some of the leading research into Postural Care and its effects.

Our equipment is suitable for those with relatively uncomplicated or the most complex of healthcare needs. We pride ourselves on the fact that our equipment is silent, hygienic and simple to use whilst our training programmes will allow you to implement this powerful form of therapy as safely and as humanely as possible.

Paediatric Night Positioning System

Simple Stuff Works

Top-to-Toe Stabilising Mesh

The base of the award-winning sleep system starts with two layers of non-slip mesh. This can be either one layer of fitted mesh with a flat top piece, or two flat pieces if the individual is maybe sharing a bed. The flexibility of this base layer makes it one of the most dynamic parts of our system.

Single Fitted Mesh:
Bottom piece –1830mm x 2500mm
Top Piece–1830mm x 1000mm
Cot Fitted Mesh:
Bottom piece –1830mm x 1300mm
Top piece –1500mm x 700mm

Mattress Topper

The Temperate Topper is a soft mattress topper which is used underneath the sheet on top of the layers of Stabilising Mesh. The topper wicks moisture away from the skin and allows air to circulate around an individual, helping to maintain a dry, temperate environment for them to rest in. The Temperate Topper is non-dynamic, neither cooling nor warming the individual.

Available in single and cot size

Fitted Sheets

Our sheets are made from a beautiful material which is hard wearing but lovely and soft. They are extra big and stretchy so that supports can be placed around an individual and the sheet will still conform to their body.

Cot bed: 700mm x 1400mm
Single bed: 900mm x 1900mm
Double bed: 1350mm x 1900m

Padded Hip Supports

The Padded Hip Supports providing firmer support for an individual. They are L shaped with soft, washable, removable pads which cover them. These are then positioned in between the two layers of mesh which hold them in place securely.

Small –100mm x 100mm x 100mm
Medium –140mm x 140mm x 140mm
Large –200mm x 200mm x 200mm

Padded Trunk Supports

The padded lateral supports are perfect for providing firmer support for an individual using our therapeutic positioning equipment. They are L shaped with soft, washable, removable pads which cover them. These are then positioned in between the two layers of mesh which hold them in place securely. They can also be used to support other items such as legs supports or pillows.

Small –100mm x 100mm x 100mm
Medium –140mm x 140mm x 140mm
Large –200mm x 200mm x 200mm

Simple Stabilizer

Simple, yet effective, the Simple Stabilizer Is a multi-adjustable leg support designed to support the pelvis and the femora. The soft base allows the legs to gently relax and provides a gentle, passive stretch overnight. The soft support at the side also prevents external rotation of the hips and keeps the legs in a functional and secure position.

Size1 = 420mm width x 110mm height x 110mm depth
Size2 = 460mm width x 190mm height x 350mm depth
Size3 = 650mm width x 250mm height x 400mm depth
Size4 = 650mm width x 280mm height x 400mm depth

The Side Lying Leg Support

Our Side Lying Leg Support is designed to protect the hips and pelvis when a person is lying on their side. The leg channel creates a perfect place for the top leg to lie and the bottom leg wraps gently around the outside. When combined with lots of support at the back of the person, a lovely supportive side lying position can be achieved. This is perfect for individuals who need to lie on their side for safety reasons. The Side Lying Leg Support comes in three different sizes and a choice of three colours.

Size 1 –380mm length x 300mm depth with a leg groove of 120mm at widest point and 50mm at narrowest

Size 2 –600mm length x 400mm depth with a leg groove of 120mm at widest point and 80mm at narrowest

Size 3 –600mm length x 400mm depth with a leg groove of 140mm at widest point and 100mm at narrowest

Support Options

We supply a wide range of options for making supports within our therapeutic positioning system. We can offer wedges, rolls and padded brackets which can be used in any combination to make a comfortable position for the individual.

Foot Supports

Our foot supports are soft supports which help to hold the feet in a neutral position for long periods of time. They are made from the same fibre as our Temperate Toppers so they help to keep the feet feeling fresh whilst they are protected from falling forwards or rotating. The foot supports come in three sizes and three colours.

Size 1 –fits from baby up to adult size 1
Size 2 –fits up to adult size 5
Size 3 –fits up to size 9

Pillows

We have lots of different pillow options which can be used to support an individual. We offer regular pillows, horseshoe pillows, sausage pillows and neck support pillows. These all come in three different colours and the firmness of each pillow can be adapted depending on the needs and comfort of the individual.

AIDS & APPLIANCES

Treat Eeiz Pressure Care Relief

The Treat Eeiz full length overlay is a revolutionary mattress topper which can be used on any standard single or double bed without affecting the partners sleep. Incredibly, it has been clinically proven to help both prevent and heal stage 1, 2, 3 and 4 pressure ulcers by Leading Tissue Viability Nurses.

The Treat-Eeziis far more comfortable than plastic or nylon air inflated products and there is no electric pump noise going on all night. It also cannot be punctured, it cannot fail in the middle of the night and it will not bottom out.

The Treat-Eezi decreases sweating allowing the patient far superior sleep and protection even in a power failure with zero maintenance costs, zero running costs, no expert training required, no pumps to fail and student nurse friendly.

The Treat-Eezireduces shearing like no other product and the patient lies in a static system without repeated movement throughout the night. It can be washed at home to 80 degrees, bleached if stained and also tumbled dried at low heat in time for same evening use.

For patients who may not want to use electric air beds the Treat-Eeziis a must. It can also be custom made for double beds or for bariatric patients up to 50 stone in weight.

Simple, yet effective, the Simple Stabilizer Is a multi-adjustable leg support designed to support the pelvis and the femora. The soft base allows the legs to gently relax and provides a gentle, passive stretch overnight. The soft support at the side also prevents external rotation of the hips and keeps the legs in a functional and secure position.
